

I've had XM as of December and would't take anything for it. I drive at night and the fact That you can get any station on this service without any interference is fantastic. The ability to get traffic and weather any where on my route is most helpful especially since most of the public stations on my route broadcast out of Mexico(I don't speak any spanish) XM has been a life saver for me on long shifts of driving this route.
Thank you for your time
